Multi-Language Chart of Accounts

Your free multi-language general ledger translation-tool

Multi-Language Chart of Accounts is specifically designed and optimized for growing companies with employees from all over the world who are experiencing misunderstanding, confusion, and errors when it comes to financial terminology and general accounts. Our app is a leading multi-language general ledger translation-tool that provides or helps you gain a streamlined chart of accounts, so everybody speaks the same language, and throughout your company, there is a consensus of financial terminology, and unlike competitors, our product is free.

When using Multi-Language Chart of Accounts, you will find how easy it is to add translations to the chart of accounts. Benefit from greater consensus on financial terminology and common account denomination. Translations in the Chart of Accounts will be available for all users in their own language. Based on the language within the Dynamics 365 Business Central client, as set by the user, the chart of accounts will be shown accordingly.
